

## Sir David Attenborough

As part of the eTwinning Project *Environment: Global Problems, Local Solutions*, we watched the documentary *David Attenborough: A Life on Our Planet*. This highly acclaimed British naturalist, born in 1926, is globally recognized for his work in the field of natural history and conservation. In this documentary film, he presents a first-person account of his life on Earth, the impacts of human activity on the environment, as well as the importance of protecting and preserving the planet for future generations.

We were so moved by his thought-provoking and inspiring message that we wrote him a letter expressing our admiration for his work, sharing some of our concerns about environmental issues and informing him about the project we are developing.

The dedication and kindness of Sir David Attenborough are of such magnitude that he sent us a handwritten letter in response, a gesture that left us deeply touched and grateful. It is a great privilege to have been considered by someone so respected and admired around the world. ❤️
