

## Zoom Meeting

As part of the eTwinning Project *Environment: Global Problems, Local Solutions*, we held a final evaluation meeting on May 17th via Zoom with the schools involved in the project, namely from Greece and Italy. Unfortunately, the school from Turkey couldn't participate due to the consequences of the earthquake that severely affected the country in February. We would like to send our support and best wishes once again to our dear Kezban and the students involved in this project.

During this session, the students and teachers had the opportunity to share a little about themselves, their schools, and the project. It was a valuable moment to strengthen intercultural relationships among the participants and celebrate the collective success in promoting local solutions for global environmental problems.

More than just a moment of learning, sharing, and inspiration, this session left all those involved with a sense of achievement and motivation to continue working towards a more sustainable future.

## Hiking & Mountain Biking

On May 25th, we had the opportunity to participate in the annual Hiking & Mountain Biking activity organized by our school, which has become a tradition among us.

Together, we ventured through breathtaking trails, exploring our region's serenity and natural beauty, keeping in mind the importance of preserving Nature. We enjoyed true moments of companionship, strengthening bonds between our school community members.

This initiative was a resounding success, reinforcing the importance of physical activity, contact with nature and environmental awareness.

We look forward to the next edition of this remarkable event in our institution!
