

## Solidarity Campaign

One of the schools involved in our eTwinning project - *Environment: global problems, local solutions* - is in Hatay, Turkey. Due to the earthquake that affected this country on 6th February 2023, we promoted a solidarity campaign in support of victims for four days, which consisted in collecting food items, among other priority goods, namely:

- powdered milk, canned or non-perishable food;

- winter clothes for adults and children;
- hygiene products and diapers;
- other materials and equipment such as tents, mattresses, blankets, sleeping bags, thermoses and torches.

On 14th February, Valentine's Day, our hearts were devoted to this cause. We packed thousands of donations in record time.

We are grateful to our school

community, particularly students, parents, the school headmaster, the course director, and teaching and non-teaching staff, for making this solidarity campaign possible.

We are also thankful to our Municipality for transporting the collected goods to São João da Pesqueira and, last but not least, to this Municipality for the initiative and for making the products reach their destination. ❤️

Solidarity Campaign in support of victims of the Earthquake in Turkey, on 6th February.
